Ancestry to Family Search

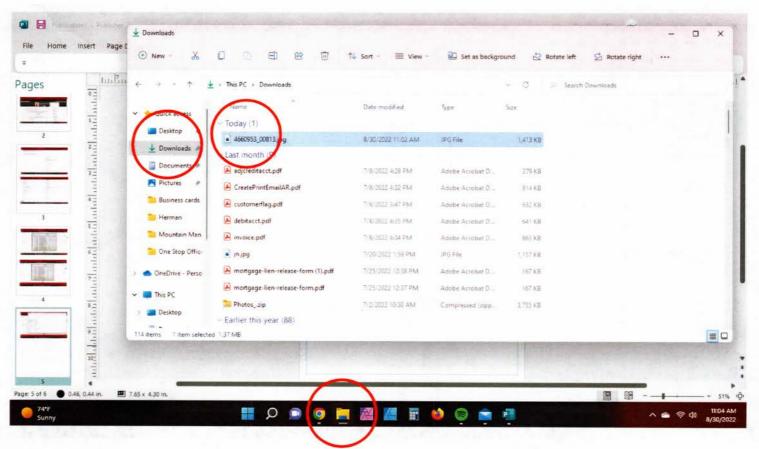

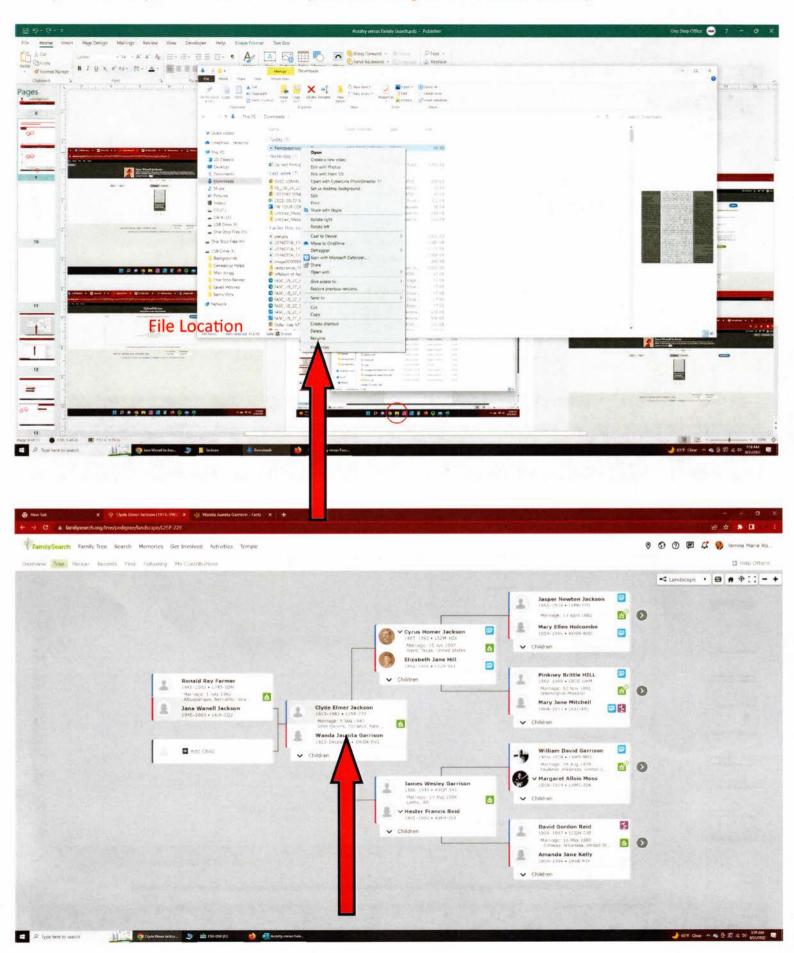

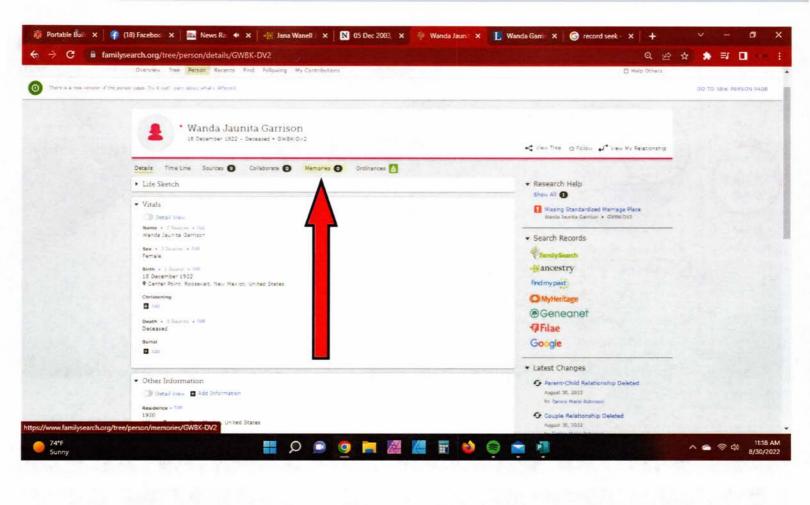

It should Save to your "downloads" unless you tell it otherwise. I suggest making a folder on your desktop.

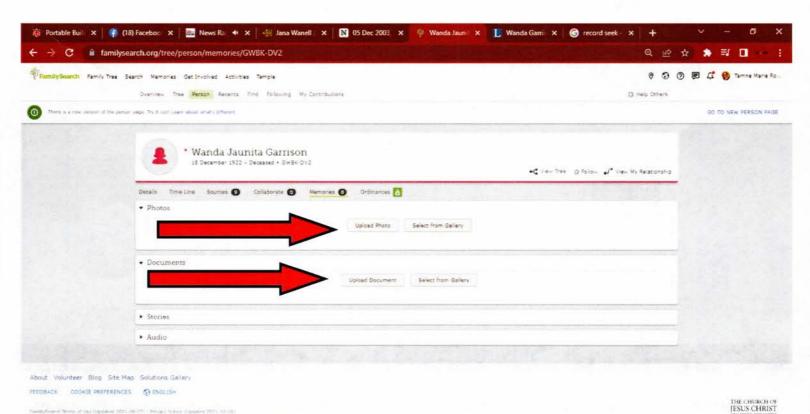

Right click on file and rename your file so you can find it easier. If you created a file on your desk top, move it to the file. (Click and Drag to file location on left)

Once it is processed you can add title, and all the information about the document. This saves it as a picture only which is proof of your information but not a source. You will need to source it. In Family search you can attach the pictures/documents to your source.

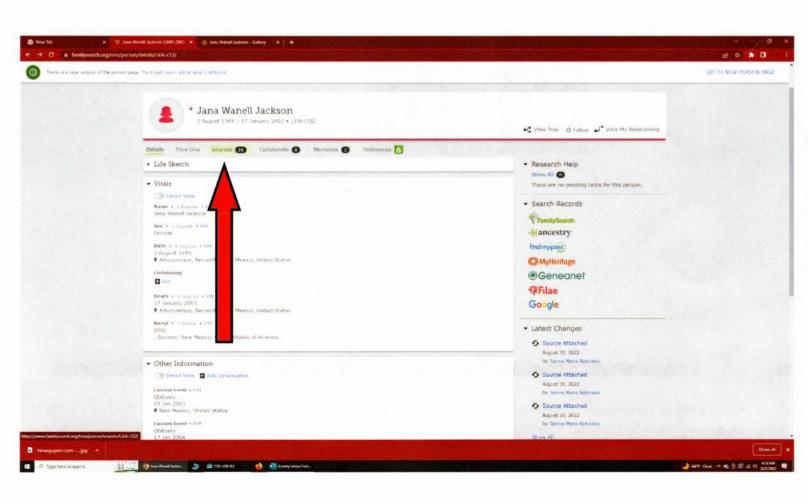

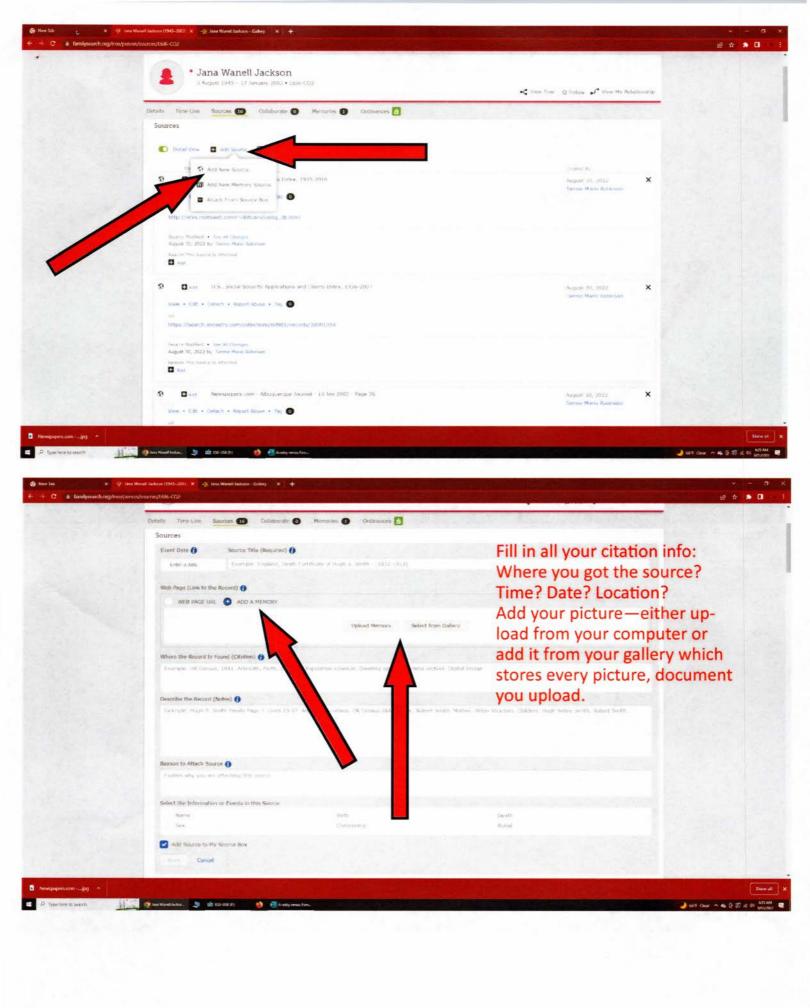

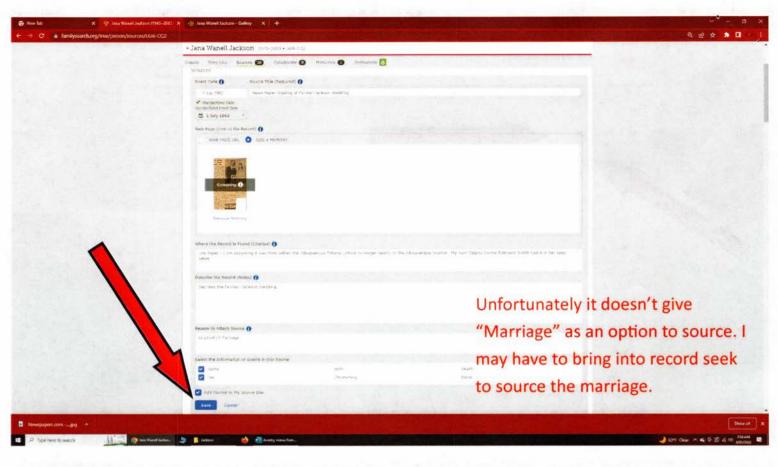

You can click on the document to tag people in the document. IF you do not have the person on your tree, you will have to add the person and them tie them to the tree. OR Go back and add them to your tree and then TAG the Document.

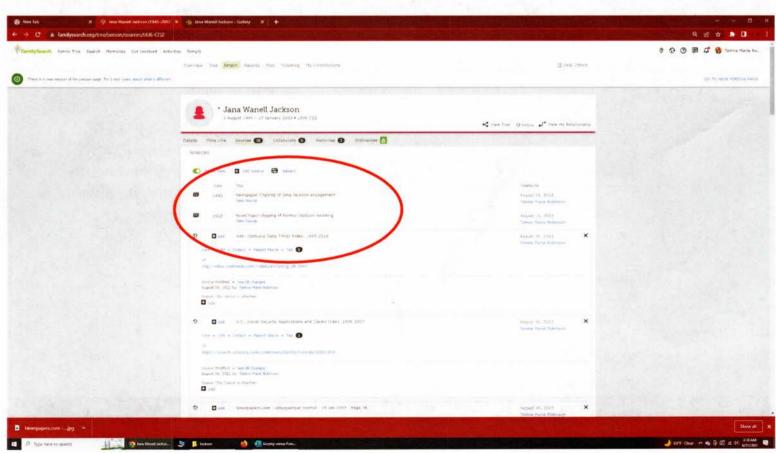

To add a new Source.

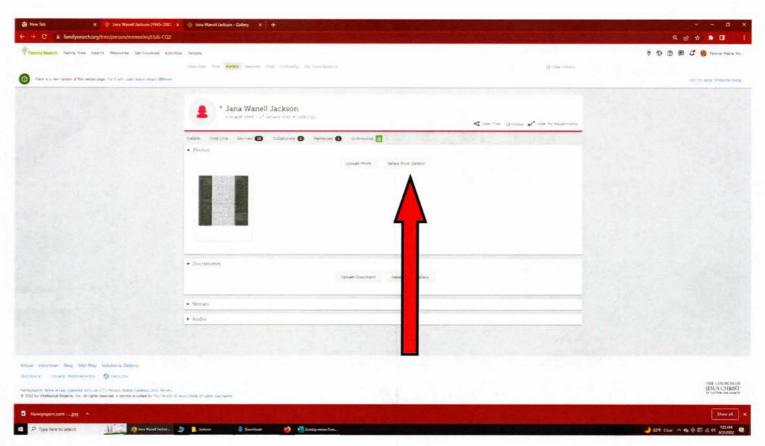

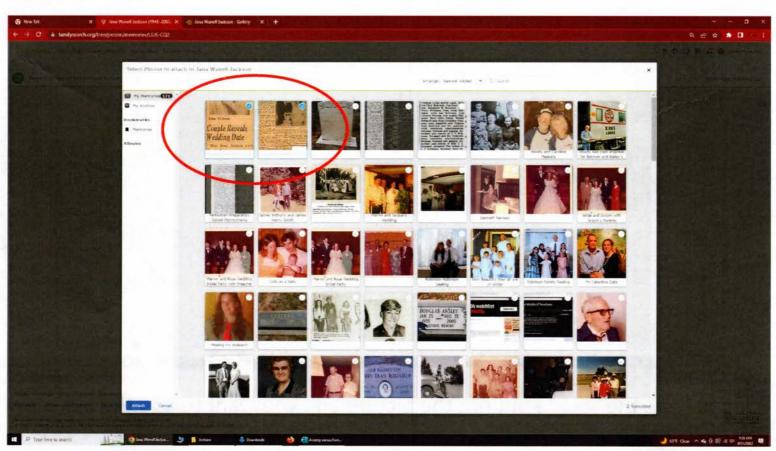

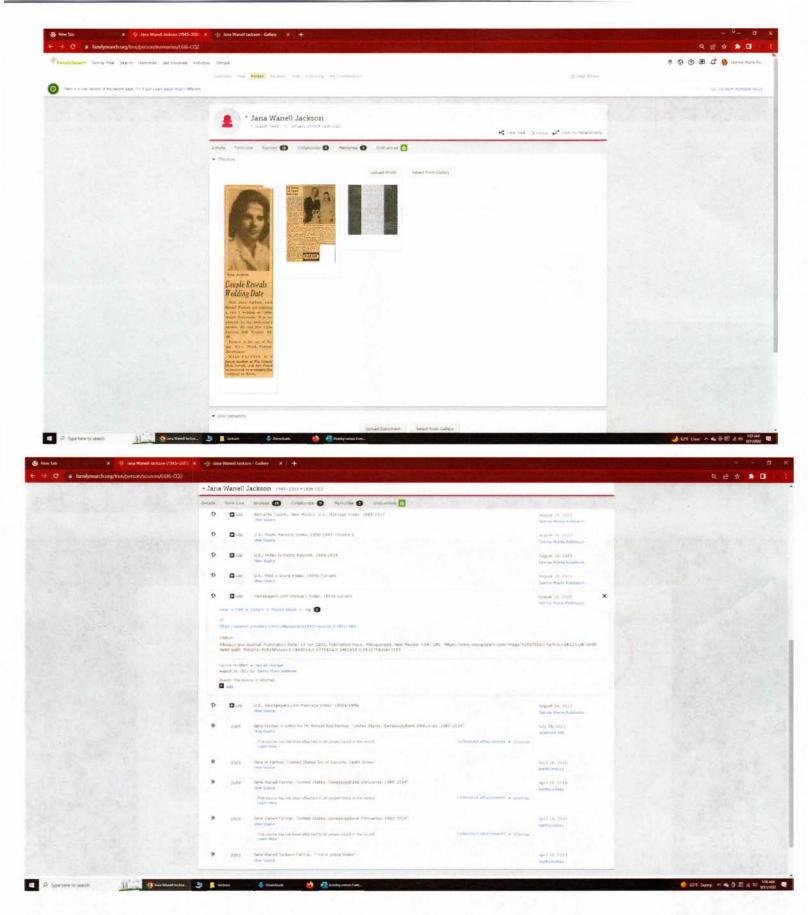

Put in your memory box also—It should be in your gallery.

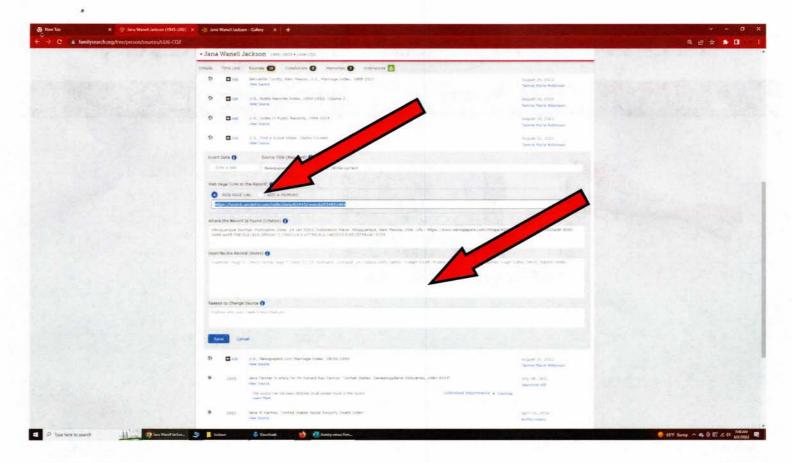

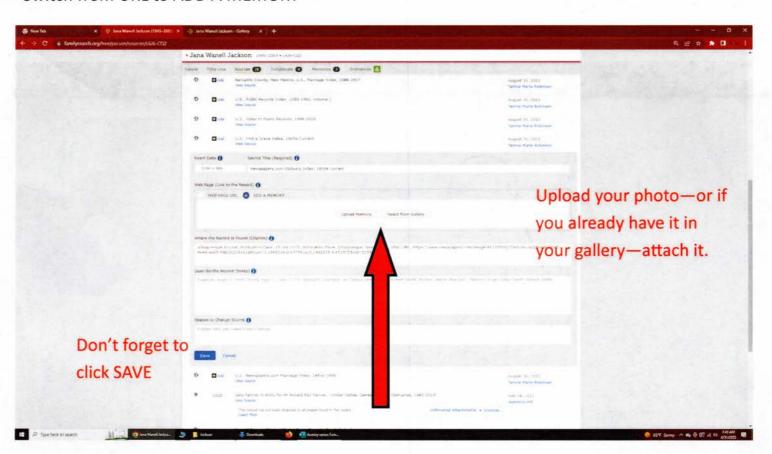

if you have the source but not the picture and you want to add the picture

Click on the source, then click on Edit...

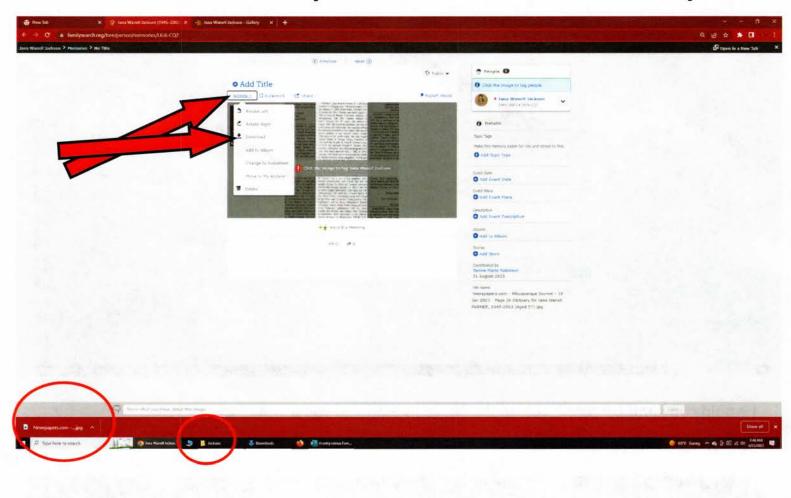

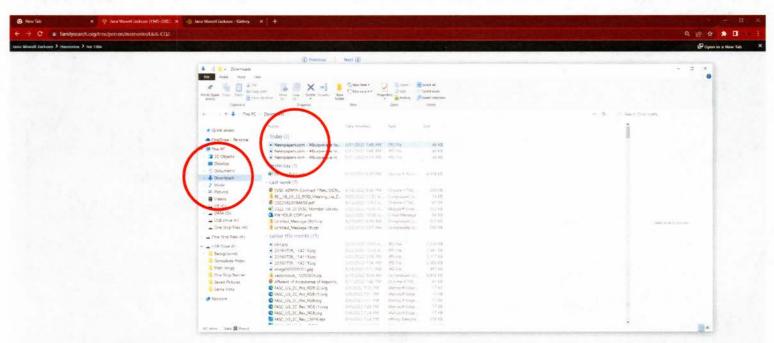

I would copy and paste the URL in the NOTES section so you always have the URL.

Switch from URL to ADD A MEMORY
