If you acquired and ancestry .com account through the member partnership link on family search you will have this link. If you are a non-member or you pay for your Ancestry.com you will not have this link and cannot user this function.

This paperwork is for members who have a member partnership ancestry account

***Know that if you bring in a GEDCOM file from Ancestry you will have to verify each and every name.

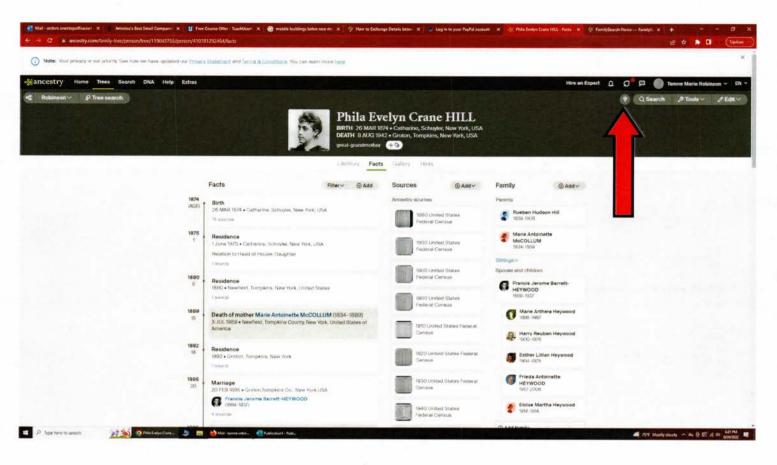

Do not bring in large GEDCOM files unless you have the time to match every name in your file.

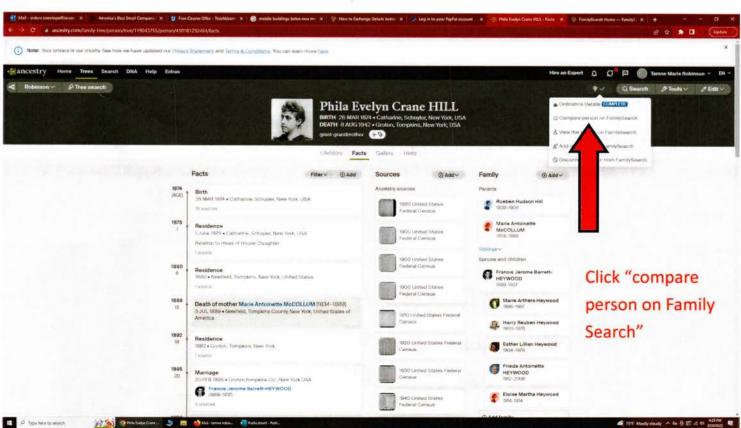

Learn from my experience—I made a lot of people angry skipping through 4500 names because I did not have the time to go through them 1 by 1 and I changed other people's information on their tree—because all the trees are connected.

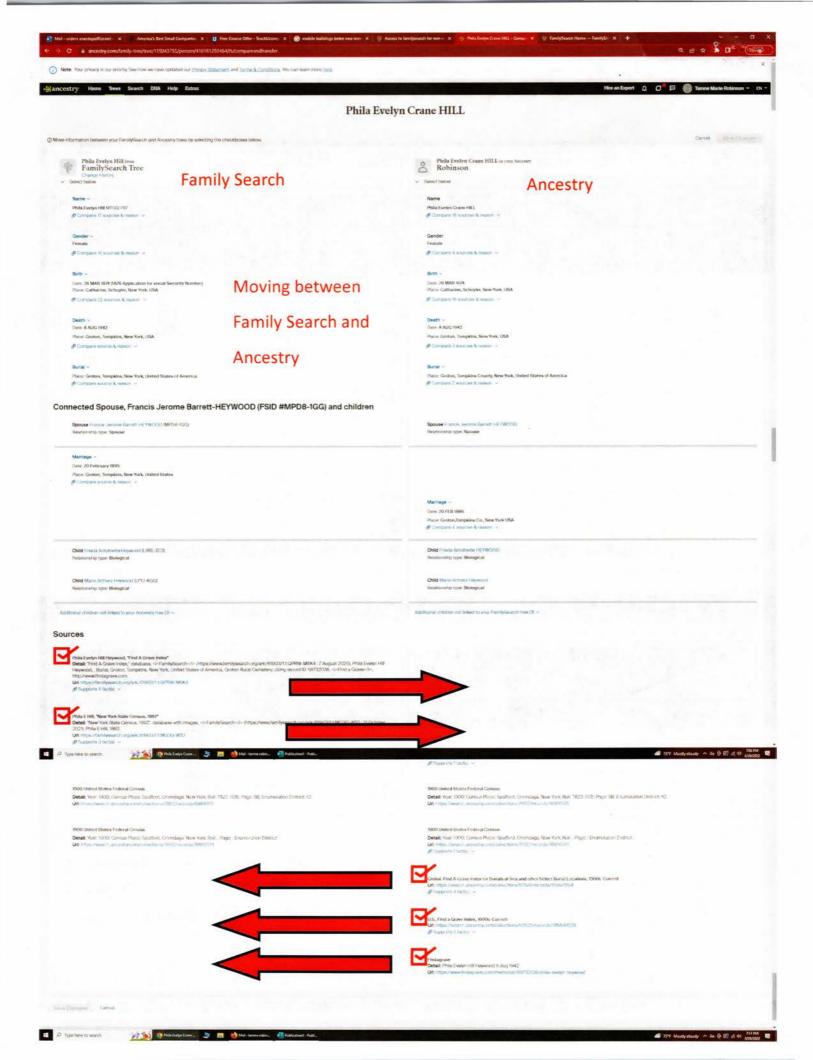

It's better to bring them over 1 at a time with all your documentation.

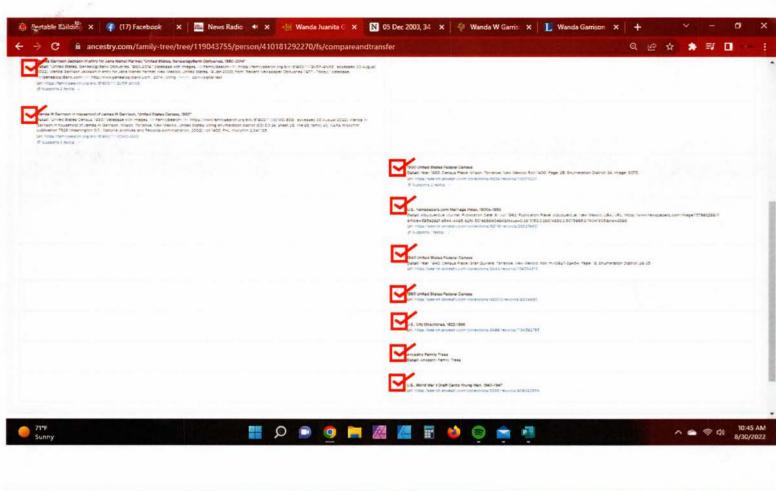

Go Back and Compare

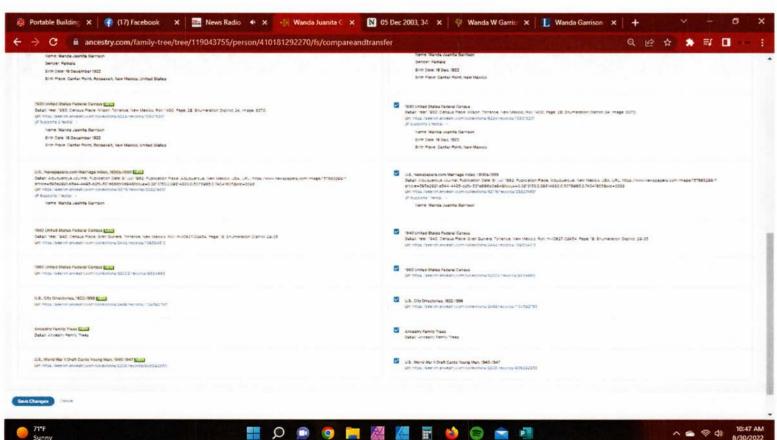

Section 1

The Citation is the only information that moves. IF you want the actual document or any pictures, you must download them to your computer and the re-upload them to FamilySearch or visa versa.

They will only save as a picture not a source. If you want them to save as a source for ANCESTRY you will have to use record seek to turn them into a source. This is another class for another day.
